Prostate MRI Imaging and/or MR-Targeted Biopsy Order Form

Please choose one of these diagnostic protocols or targeted MRI-guided biopsy.

<table>
<thead>
<tr>
<th>Surgical Staging (IMG5564)</th>
<th>Locoregional Staging (IMG5563)</th>
<th>Focused (IMG5563)</th>
<th>Targeted MRI Guided Biopsy (IMG5587)</th>
</tr>
</thead>
</table>
| Endorectal coil provides the highest resolution to identify T2 vs. T3 disease. Includes DCE + DWI, pelvic bones, and lymph nodes. Always with contrast. Common uses:  
- Surgical staging  
- Spectroscopic imaging  
- Active surveillance | MRI without an endo-rectal coil identifies suspicious areas as well as abnormal lymph nodes and bone lesions. Common uses:  
- Brachytherapy planning  
- Radiotherapy planning  
- Biochemical failure | Prostate-only scan with DCE + DWI but without endorectal coil limits patient’s time in the scanner. Common uses:  
- Biopsy planning  
- Active surveillance  
- Follow-up  
- Abnormal PSA but negative biopsy | Targeted biopsy of a suspicious area found on prostate MRI (local or non-UCLA). MRI confirms needle placement. Takes about 1 hour of table time. Uses conscious sedation.  
Scheduled separately from diagnostic MRI. |
| Options:  
- Spectroscopy  
- 3D Volume | Options:  
- Add abdomen  
- No contrast (IMG5562)  
- 3D Volume | Options:  
- No contrast (IMG5562)  
- 3D Volume  
- 3D Mobile Fusion | Protocol:________ |

History/Indication: ______________________________________________________

Do any of the following apply to this order?

- Planned robotic prostate surgery
- Deciding on surgery vs. other treatment planning
- Abnormal PSA but negative biopsies candidate
- Other: ____________________________

Biopsy planning
- Radiation therapy
- Active surveillance

When was the last biopsy (date)? ____________________________ Result? ________________

What is the PSA (if known)? ____________________________ From what date? ________________

Next clinic appointment date? ____________________________ Surgery/treatment date? ________________

What kind of surgery/treatment is planned? ____________________________

Do any of the following apply to your patient?

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
<th>Condition</th>
<th>Yes</th>
<th>No</th>
<th>Condition</th>
</tr>
</thead>
</table>
|     |    | Diabetes? | If so, is it controlled with:  
- medication?  
- insulin? | Insulinoma (pancreatic tumor that secretes insulin)? | Hemorrhoids or rectal bleeding? |
|     |    | Part of a clinical trial? Which? | Anal fisure or similar condition? | Prior surgery to the anus or rectum or prostate? | Prior radiation therapy to the pelvis? |
|     |    | Metal in hips or pelvis? What kind? | Inflammatory bowel disease or other rectal inflammation? | | | | | | |
